

Student Name: Rachitha R

Reg. No.: 192421058

Course Code: ITA1409

Slot: A

Course Name: Ethical Hacking

Course Faculty: Dr. Ruby Elizabeth

EXP:11 Execute and display the results for the following Nmap Timing and performance commands in Kali Linux operating Systems:

Aim:

To execute and display the results of Nmap timing and performance commands for aggressive speed scanning and insane speed scanning in Kali Linux.

i. Aggressive speed scan

```
(rachitha@kali)-[~]  
$ nmap -T4 127.0.0.1  
Starting Nmap 7.99 ( https://nmap.org ) at 2026-10-09 09:03 +0530  
Nmap scan report for localhost (127.0.0.1)  
Host is up (0.0000070s latency).  
All 1000 scanned ports on localhost (127.0.0.1) are in ignored states.  
Not shown: 1000 closed tcp ports (reset)  
  
Nmap done: 1 IP address (1 host up) scanned in 0.19 seconds
```

ii. Insane speed scan

```
(rachitha@kali)-[~]  
$ nmap -T5 127.0.0.1  
Starting Nmap 7.99 ( https://nmap.org ) at 2026-10-09 09:05 +0530  
Nmap scan report for localhost (127.0.0.1)  
Host is up (0.0000070s latency).  
All 1000 scanned ports on localhost (127.0.0.1) are in ignored states  
Not shown: 1000 closed tcp ports (reset)  
  
Nmap done: 1 IP address (1 host up) scanned in 0.20 seconds
```

Result:

Thus, the Nmap timing and performance commands were executed in Kali Linux. The -T4 option was used for aggressive speed scanning, and the -T5 option was used for insane speed scanning.
